SAT MATH I™

The minute you start using SAT Math, you're on your way to a better score on the Scholastic Aptitude Test (SAT) of the College Entrance Examination Board. Every type of question you'll face in the math section of the actual SAT exam, you'll see in SAT math first. So you'll really be prepared.

SAT Math helps you like many other math tutorials can't. Because in addition to a test mode, SAT Math has an instruction mode that provides clear explanations for each answer you choose. Even incorrect ones.

This unique tutorial format helps you learn faster than simple self-testing. SAT Math tells you *why* the answers you select are correct or incorrect.

With SAT Math, you may even want to go back and select incorrect answers on purpose just to see all the explanations. It's a great way to increase your understanding of a given math operation. And when you sit down to take the actual SAT exam, your chances for a higher score are bound to increase.

SAT Math can help you improve your score in all these areas:

- **Arithmetic**
- **Algebra**
- **Plane geometry**
- **Probabilities**
- **Exponents**
- **Square root**
- **Fractions**
- **Quantitative comparisons**
- **Ratios**
- **Negative numbers**
- **Least common multiplier**
- **Graphs**
